About Me

I am a dedicated and motivated student majoring in Information Technology (Teknik Informatika) with a strong passion for web design and development. I am keen on learning and growing in the field of Information Technology, with interests that span across various domains including web development, database management, and system analysis. My goal is to leverage my skills and knowledge to contribute effectively in a professional setting while continuously enhancing my expertise.

Education

2018 - 2022 | SMA 3 | Science Major

Completed Science Stream (IPA) with a focus on Mathematics and Physics.

Actively participated in various extracurricular activities including the IT Club and Robotics Club. Achieved top grades in subjects related to technology and computer science. Engaged in several school projects involving basic programming and web design.

2022 - Present | Muhammadiyah University | Informatic Engineering

This program prepares students to manage various aspects of information technology, such as software development, database management, cybersecurity, computer networking, data analysis, and systems engineering. Students are also equipped with knowledge and skills in programming, web design, and the implementation and management of IT infrastructure to support business and organizational needs.

Skills

Web Development (HTML, CSS, PHP) | Database Management (MySQL)
